BioArchitecture – One or Two Day Seminar

BioArchitecture

BioArchitecture brings the Heart of the Earth into the Hearth of the Home.

We define BioArchitecture as the Art and Science of designing and constructing buildings which create, support and enhance life and living systems.

In this Seminar we will introduce the pure principles of how Nature uses specific geometries to generate all that we see in the natural world.

We will show how our bodies perceive the world around us, at a sensory level, and why we are particularly attracted to objects, places, people and situations that are intrinsically fractally harmonic and beautiful.

We will explore how the ancients used this knowledge to build their sacred structures and how we can use this vital information to design and construct our own sacred space.

We will present many photographs of completed projects and other designs that demonstrate the potential of this timeless design philosophy.

We will create some geometric constructs which will enable us to physically feel and appreciate the energetics of the space. We will demonstrate how this information can assist us in our own development; enhancing our Earth connection, and enlivening all of our relationships.

Michael Rice is a practical visionary, who transforms dreams into reality. He is a Bioarchitect, a Master Geometer, Designer, Builder and Teacher. Originally from Ireland, Michael travels the world designing, teaching and consulting.

Karaimi creates beauty and harmony wherever she goes. She is practical, grounded and deeply connected to the Earth. Her natural sensitivity and awareness enables her to touch and feel the fullest potential of a place or space. She is a natural and inspirational teacher and consultant, and offers her services all around the world. She lives in the Czech Republic.
